

## Upcoming Changes to the Formulary

During the plan year, drugs may be added to or removed from the formulary. If we remove drugs from the formulary, add prior authorization, quantity limits and/or step therapy restrictions on a drug, and/or move a drug to a higher cost-sharing tier, we will notify you of the change at least 60 days before the date that the change becomes effective. However, if the Food and Drug Administration deems a drug on our formulary to be unsafe, or if the drug's manufacturer removes the drug from the market, we will immediately remove the drug from the formulary.

The table below outlines upcoming change(s) to our formulary that may impact you.

| Effective Date | Formulary Affected | Affected Drug                     | Description of Change** | Reason for Change                 | Alternative Drug**                             | Tier of Alternative Drug |
|----------------|--------------------|-----------------------------------|-------------------------|-----------------------------------|--|--------------------------|
| 11/1/09        | Signature          | Casodex                           | Deletion                | New generic added                 | Bicalutamide                                   | Generic                  |
| 7/3/09         | Signature          | Arixtra                           | Tier increase           | Price meets specialty requirement | Lovenox  | Specialty                |
| 7/3/09         | Signature          | Alora transdermal patch           | Deletion                | Lower tier alternative available  | Estradiol transdermal patch                    | Generic                  |
| 8/1/09         | Signature          | CellCept 250 mg                   | Deletion                | New generic added                 | Mycophenolate Mofetil 250 mg                   | Generic                  |
| 8/1/09         | Signature          | CellCept 500 mg                   | Deletion                | New generic added                 | Mycophenolate Mofetil 500 mg                   | Generic                  |
| 5/1/09         | Signature          | Cosopt 2-0.5% ophthalmic solution | Deletion                | New generic added                 | Dorzolamide-Timolol 2-0.5% ophthalmic solution | Generic                  |
| 5/1/09         | Signature          | Depakote DR                       | Deletion                | New generic added                 | Divalproex Sodium DR                           | Generic                  |
| 6/1/09         | Signature          | Depakote ER 250 mg tablet         | Deletion                | New generic added                 | Divalproex Sodium SR 24 Hr 250 mg tablet       | Generic                  |
| 8/1/09         | Signature          | Depakote ER 500 mg tablet         | Deletion                | New generic added                 | Divalproex Sodium SR 24 Hr 500 mg tablet       | Generic                  |

| Effective Date | Formulary Affected | Affected Drug                    | Description of Change** | Reason for Change                     | Alternative Drug**                         | Tier of Alternative Drug |

\* This change will not affect your coverage for this drug for the remainder of the plan year if you are currently taking this drug.

\*\*Please consult with your physician as to whether this is an appropriate drug for you, as he or she must decide to prescribe it for you if appropriate. If none of the alternative drugs listed above are right for you due to your medical condition, you may request an exception to our formulary. To file a request, you must have a supporting statement from your physician. If your physician has demonstrated the need for a drug not on our formulary, we will grant a drug exception. For more information, you can call us at 1-866-316-6049 from 8:00 a.m. to 8:00 p.m., every day. TTY/TDD users should call 800-975-8089.
